

## Briefing Note for the Member Forum and Content Managers Advisory Group May 2022

---

### Call for participation in Drug Content Analysis Working Group

#### Purpose

To announce the formation, and ask for participation, in a new Drug Content Analysis Working Group.

#### Background

The Drug Extension User Support Group identified the need for greater coverage of Clinical drug (CD) concepts in the International Release as one of their priorities.

To address this concern, a new Drug Content Analysis Working Group is being formed, and will be tasked to identify CDs that are candidates for inclusion in the International Release using a standardized process.

The Drug Content Analysis Working Group is expected to have its initial meeting in fall 2022. SNOMED International will provide a project coordinator and support from the Content Team. Co-chairs and subject matter experts are needed from interested members, affiliates, or implementers.

If interested in participating, please email Monica Harry, Director, Content and Mapping, at [mha@snomed.org](mailto:mha@snomed.org).

Approvals	Date	Name
Chief Terminologist	2022-06-13	James T. Case
Director of Content and Mapping	2022-05-25	Monica Harry
