INTERSOCIAL
Connectant Persones
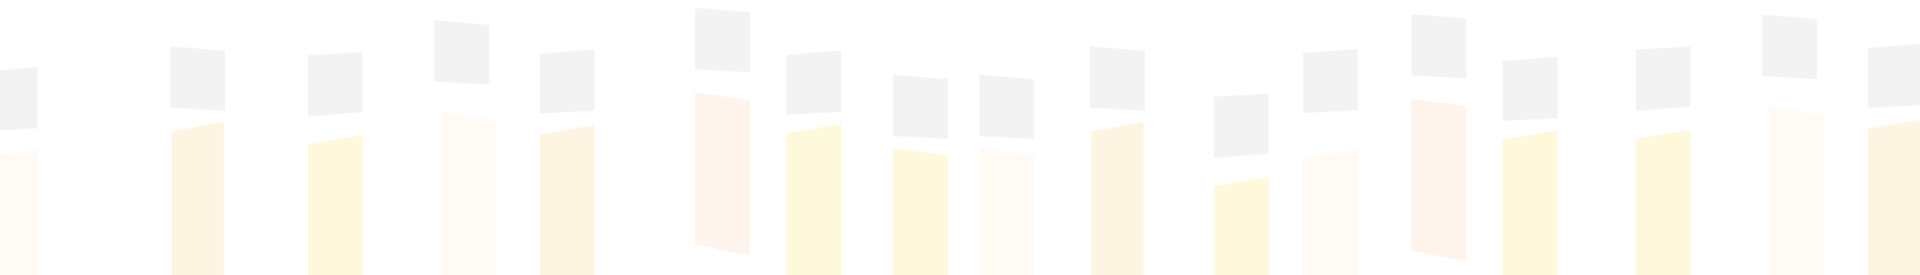

Semantic interoperability in social care

General information

- **Period of time**: January - December 2016.

- **Main objective**: Define a common controlled vocabulary to standardize the problems and responses in the field of social care.

- **Standards used**: SNOMED CT — The global language of healthcare

- **Next steps:**
  - Dissemination of results.
  - Maintenance
 - Second part.

Background

INTERSOCIAL
Connectant Persones

"Two monologues do not make a dialogue"

Participants

Participants

Methodology
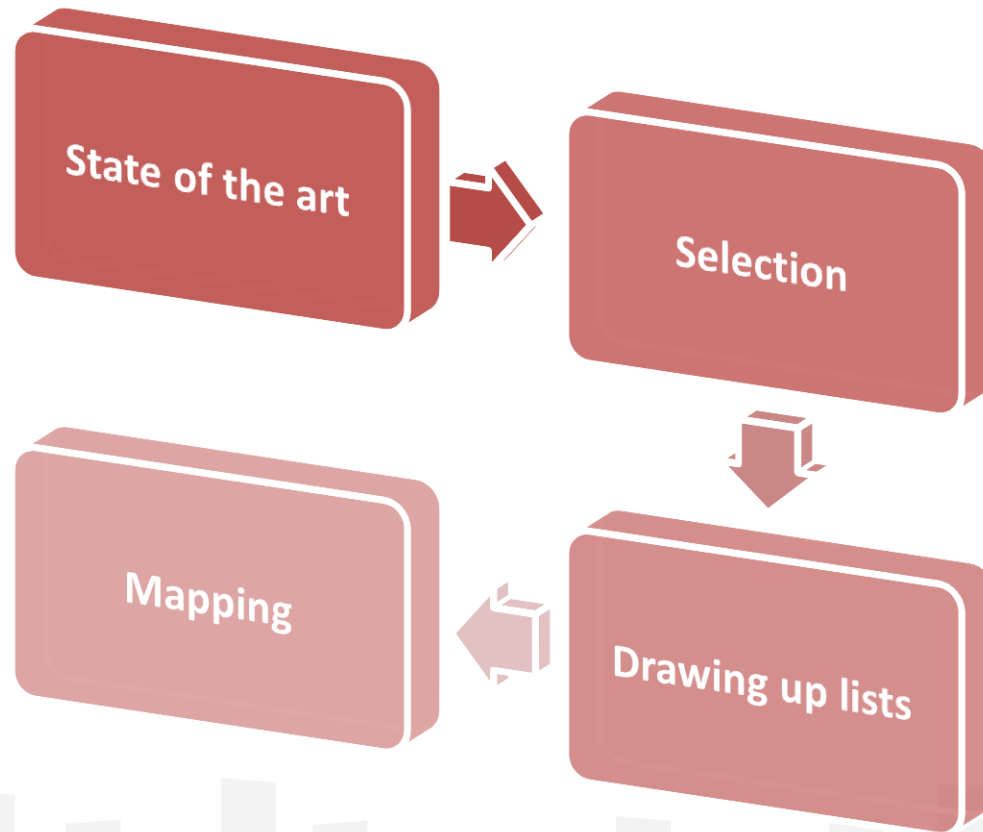

Results

Woman

Major opiate

Family support

Rejects formal help of SS

88 years old

14 medications per day

Widow

Advanced heart failure

Falls

Cognitive impairment

Lives alone

Revenues

NYHA 3
