

201950 SNOMED on FHIR

Peter G Williams, SNOMED International (United Kingdom)

Summary

This session will discuss the work being undertaken by the joint SNOMED International and HL7 International group which is agreeing approaches to the use of SNOMED CT in FHIR artefacts. This will include work on profiles, including Allergy Intolerance and Medication resources, agreeing a SNOMED CY freeset for use in FHIR, work on Terminology Services and work on developing an Implementation Guide for use of SNOMED CT in FHIR. We will also talk about how you can get involved and apply this work

Audience

Clinical, Technical, Implementers, Terminology Developers

Abstract

This session will discuss the work being undertaken by the joint SNOMED International and HL7 International group which is agreeing approaches to the use of SNOMED CT in FHIR artefacts. This will include work on profiles, including Allergy Intolerance and Medication resources, agreeing a SNOMED CY freeset for use in FHIR, work on Terminology Services and work on developing an Implementation Guide for use of SNOMED CT in FHIR. We will also talk about how you can get involved and apply this work
