● Iatrogenic hypotension	Iatrogenic hyp
☰ History of hypotension	History of hyp

We develop and operate applications and platforms to support our products and services. All the software developed by SNOMED International is available under an open source license and available to any stakeholder wishing to use the tools in their own environment.

SNOMED International's open source repositories can be located at: <https://github.com/IHTSDO>

SNOMED CT Software & Tools

SNOMED CT Browser

- **provides ways to browse and search** different SNOMED CT Editions from SNOMED International and its Member countries
- **available to anyone** to use for reference purposes <https://browser.ihtsdotools.org/>

Refset Management & Translation

- **provides a means** to search for, create, manage and translate SNOMED CT reference sets
- **allows for translation** of SNOMED CT into other languages to enable local implementations <https://refset.ihtsdotools.org>

Mapping Tool

- **enables mappings** from SNOMED CT to other code sets
- **supports multiple terminologies** and SNOMED CT extensions
- **stakeholders can leverage** the open source code <https://confluence.ihtsdotools.org/display/MT/Features>

Authoring Platform

- **allows** customers and stakeholders to author content. Stakeholders can leverage the open source code

Collaborative environment

- **we encourage** knowledge sharing between our stakeholders and host a collaborative environment to facilitate this <https://confluence.ihtsdotools.org>

SNOMED International Managed Service

- **online service** for SNOMED International Members to manage and distribute a release of a SNOMED CT local extension from start to finish in simple, standard manner
- **provides a value for money**, off the shelf service for SNOMED International Members, benefitting from the use of a shared platform
- **a fully hosted service** with:
 - > access to SNOMED International technical and content staff for support
 - > use of the SNOMED CT Authoring Platform and the Reference Set & Translation tool
 - > validation, release and distribution of SNOMED CT local extensions twice a year
