SNOMED International
Leading healthcare terminology, worldwide

Helping the vendor community extend SNOMED CT functionality and benefits directly to their customers

Working with SNOMED CT as a Vendor

Benefits to using SNOMED CT in your solution:

- Demonstration of your committment to interoperability

- Increased functionality and global marketability for your solution

- Integration with other key HIT standards

- Participation in our community of practice

- Reduction in time & investment to deploy your solution

- Access to our technical support, services and tools

SNOMED CT

supports the development of comprehensive high-quality clinical content in electronic health records. It provides a standardized way to represent clinical phrases captured by the clinician and enables automatic interpretation of these.

Why SNOMED CT?

Our clinical terminology enables interoperability, large-scale public health reporting, high quality research, reduces clinical risk and much more.
