

Substances Project

Welcome to the Substances Project Space!

This is a landing page to explain what this project is about. Most of the specific information about the group is kept in another Confluence space: [Substance Project](#).

The Substances Project has a project team, which is a closed group. It does not have a formal Project Group.

Leading healthcare terminology, worldwide

Interested in drugs and substances within SNOMED CT? You may also be interested in [Drug Project](#).

Purpose

The Substances Hierarchy Project aims to deliver a plan to update to substances content and provide a robust concept model for substance representation.

Scope

The scope of the project is to

1. Provide a re-design of Substances hierarchy and document a review of previous SNOMED CT substances work.
2. Provide a strategy and a project plan for the implementation of the re-designed hierarchy.
3. Implement the re-designed hierarchy on content.
4. Write SNOMED CT Editorial Guidelines on the Substances hierarchy.

Leads

[Phuong Skovgaard](#) and [Emma Melhuish](#)

Meetings

Internal project meetings only; this is a project team effort not project group effort

Face to Face

Conference meetings are out of scope for this group
