2. SNOMED CT Implementation

This part of the guide introduces the rationale for implementing SNOMED CT. It identifies some of the types of software application that benefit from the features of SNOMED CT. It sets out some broad parameters that determine the extent to which an application can make use of particular aspects of SNOMED CT and outlines some approaches to delivering the required services. It include sections covering the following topics:

- 2.1. Motivation for Implementation
- 2.2. Implementation Types
- 2.3. Implementation Levels
- 2.4. Implementation Services

More detailed considerations related to implementation are included in the following SNOMED CT guidance documents:

- Vendor Introduction to SNOMED CT
- Terminology Services Guide
- Record Services Guide
- Search and Data Entry Guide
- Data Analytics with SNOMED CT
