

# Maintenance and Automations

## Overview

Documents standard automated maintenance processes run by ITHSDO in the production installation of the mapping tool.

## Details

These pages describe automations that are configured for the production ITHSDO deployment of the mapping tool. A locally installed instance of the tool would likely want similar configurations for that particular environment.

The following maintenance automations are used.

- [Quality Assurance Checks](#)
- [Report Generation](#)
- [Drip Feed](#)
- [Daily Build](#)
- [Terminology Updates](#)
