Release versions related to component build versions

Release Version	Front-End Build Version	Back-End (Snow Owl TS) Build Version	Date	Description
4.2.0	4.2.0	6.10.7	4 April 2019	This is a scheduled maintenance and feature release for prioritised QI support, and prioritised Managed Service support, including Drools Rules updates, and Reporting Platform updates, accompanied by a major upgrade for the Identity Management Service (IMS) for streamlined login/authentication and related platform configuration updates for improved stability and maintainability.
4.1.0	4.1.7	6.10.5	14 February 2019	This is a scheduled feature release for volume authoring using templates for concept transformation, prioritised QI support, and prioritised Managed Service support, including Drools Rules updates.
4.0.1	3.4.0	6.10.4	23 January 2019	This is an expedited update to resolve a compatibility issue for the TS Browser with some dependencies on SnowOwl 6.* Terminology Server changes.

4.0.0	3.4.0	6.10.4	21 January 2019	This is a maintenance release to move the Terminology Server to the SnowOwl 6.* stream (previous releases were SnowOwl 5.*). This update is needed for future maintenance and technical support of the platform using the SnowOwl Terminology Server. Whilst gaining some benefits (for instance improved ECL support) through the improvements inherent to this later version of SnowOwl, this release focuses purely on stability of the updated platform and like-for-like functionality with the previous AP Version 3.3.0 release - there are no added features, legacy improvements or legacy bug fixes in this version.
3.3.0	3.3.1	5.16.3	12 December 2018	This is a scheduled feature release for prioritised QI support, and prioritised Managed Service support, including Drools Rules updates.
3.2.0	3.2.1	5.16.2	21 November 2018	Scheduled feature release for volume authoring using templates for concept transformation, prioritised QI support, and prioritised Managed Service support, including Drools Rules updates.
3.1.0	3.1.1	5.15.2	3 October 2018	Scheduled feature release for volume authoring using templates for concept transformation, prioritised QI support, and prioritised Managed Service support, including Drools Rules updates, along with related RVF validation report assertions and Classification Service updates.
3.0.4	3.0.9	5.15.1	27 September 2018	Expedited improvements for Traceability Service logging related to review visibility.
3.0.3	3.0.9	5.15.1	17 September 2018	Expedited performance improvement update, including Authoring-UI and Drools Rules updates to synchronise International with those already deployed for Managed Service in AP Version 3.0.1 and Drools Rules Version 1.23.0. This release fixes rollback issues from AP Version 3.0.2, aggregates the changes from that version, and also includes a TS Browser performance fix for an issue affecting server loading.
3.0.2	3.0.9	5.15.0	13 September 2018	Expedited performance improvement update, including Authoring-UI and Drools Rules updates to synchronise International with those already deployed for Managed Service in AP Version 3.0.1 (Deployment reverted to AP 3.0.1).
3.0.1	3.0.9	5.14.0	4 September 2018	Managed Service only - updates for IE and CH language/dialect support.
3.0.0	3.0.8	5.14.0	14 August 2018	This is a scheduled feature release for volume authoring using templates for concept transformation and prioritised QI support, including a Drools Rules update.
2.9.1	2.9.6	5.13.0	28 June 2018	Scheduled maintenance release.
2.9.0	2.8.15	5.12.2	25 April 2018	Scheduled feature release for prioritised QI support (with Drools Rules update).
2.8.3	2.8.13	5.11.7	29 March 2018	BE hotfix release (published component deletion issue). This deployment rolled up the AP 2.8.2 Managed Service hotfix change for International to maintain front-end module version alignment across the platforms.
