

New Features & Improvements - January 2017

This page provides some useful guides on how to use the new functionality available v1.1.11 of CRS deployed in January 2017. More details on what was in the release can be found on the [January 2017 Release Notes](#).

Request Lists:

Highlighted list menu

- CRS will now highlight the current request list that the current user is viewing

The screenshot shows the 'Content Request Service' dashboard. The left-hand navigation menu has 'My Assigned Requests' highlighted in blue. The main content area displays a table of requests assigned to the current user, 'CRS Test Administrator'. The table has columns for Batch ID, Request ID, Concept, Jira ID, Requestor, Created, Modified, Type, Topic, and Status. The first row is highlighted in light blue, indicating it is the current view.

Batch ID	Request ID	Concept	Jira ID	Requestor	Created	Modified	Type	Topic	Status
698357	700358	Body structure (body structure)	CRT-86872	CRS Test Administrator	2016-11-24	2016-12-16	New Relationship	diseases	In Appeal
698357	700356	A New Concept (administrative concept)	CRT-86873	CRS Test Administrator	2016-11-24	2016-12-16	New Concept	A New Invalid Concept	In Inception/Elaboration
	700322	Test	CRT-86841	CRS Test Administrator	2016-10-25	2016-10-26	New Concept	Allergies	In Inception/Elaboration
	700183		CRT-86792	CRS Test Manager	2016-09-28	2016-09-28	Other	Substance	New

Default selected list

After login to CRS, CRS will select the default request list based on the current user role:

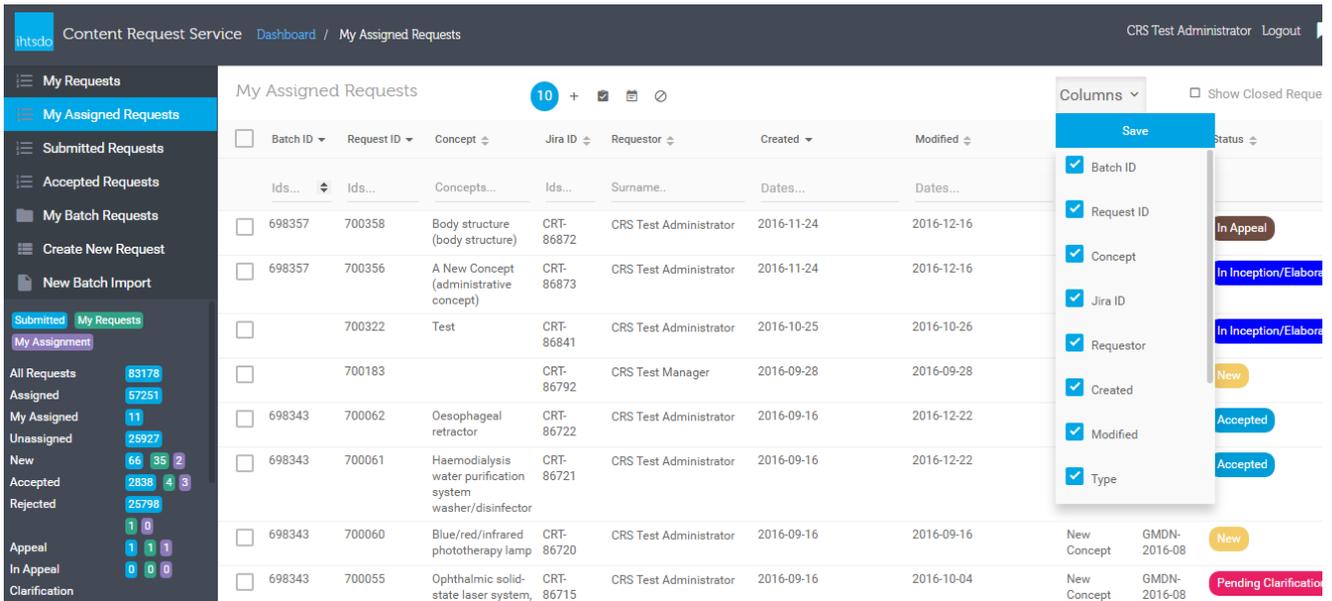

- If the current user is a requestor, the default selected list will be "My Requests".
- If the current user is a manager, the default selected list will be "My Assigned Requests".
- If the current user only has view permission, the default selected list will be "Submitted Requests".

Show/Hide Columns

In all of the requests lists (My Requests, My Assigned Requests, Submitted Requests, Accepted Requests), users can select what columns to show or hide by following the below steps:

- Click on the "Columns" button on any list, a drop down will be shown
- Tick a column name that should be shown, untick a column name to hide it
- Click on "Save" button on top of the drop down, the settings will be saved and the next times the user use that list, the settings will be applied automatically

Each list has its own columns settings, configuration on one list will not affect another list. If user want to apply the settings to all the list, they have to updated all the configuration on all of the list

New Bulk Actions

Withdraw requests

Requestors can withdraw multiple requests at the same time by following the below steps:

- Open "My Requests" list
- Tick the requests that will be withdrawn
- Click on "Withdraw Request(s) button on top of the list
- When a dialog is displayed, typed in the reason, click "Confirm", the reason will be added to all the selected request

After CRS finishing updated the selected requests, the results will be displayed

Request Details:

Get Next Request

If users open requests details from any of the request list (My Requests, My Assigned Requests, Submitted Requests, Accepted Requests), users can traverse the selected list without going back to the list view by using the "Next Request" button on the left panel of the form

This button is only enabled if the request details form is opened by from the request list, if users access this form by opening the links, this button won't be enabled

Appeal Clarification

Managers can ask for clarification for appeals from requestors by using the "In Appeal Clarification" button on the left panel in the request details form. This action will update the status of the request to "In Appeal Clarification"

If the request status is "In Appeal Clarification", managers can decide to reject or accept the appeals

Change Local SNOMED CT Code

Managers can update the "New Concept" request's "Local SNOMED CT Code" after submission by using the "Change Local SNOMED CT Code" from the left panel

New Concept Validations

The validation for "New Concept" requests has been updated with 2 new checks:

Local SNOMED CT Code format check: if user input value into "Local SNOMED CT Code" field, CRS will check the input value with CIS to validate and return the result. If CRS returns an error, the value must be updated to meet SCT ID validation rules

Updating new concept release information

When releasing new concept, external services can update release information on CRS by using a REST API documented in: <https://uat-request.ihtsdotools.org/ihtsdo-crs/swagger-ui.html#!/request-apis/updateReleaseInfoUsingPUT>. After submission, the information can be updated at any state of the request. After updating, the information will be shown in the request details form

The screenshot displays the 'Content Request Service' interface. The top navigation bar includes 'iTask', 'Content Request Service', 'Dashboard / Requests / 700356', 'CRS Test Administrator', and 'Logout'. The left sidebar contains a list of request details:

- Batch ID: 698357
- Created By: CRS Test Administrator
- Manager: CRS Test Administrator
- Created Date: 2016-11-24
- Jira Ticket ID: CRT-86873
- Request Url: url
- Tracker Id: tracker id
- Inspected/New Concept ID: 1122334455
- New FSN: New concept (administrative concept)
- Last Modified Date: 2016-12-30

The main content area is divided into two panels:

- Preview Request:** Shows fields for 'Local SNOMED CT Code' (181382006), 'Local Code', 'Topic' (A New Invalid Concept), 'Summary' (A New Concept), 'Proposed Use Case' (My Reason for Changes), 'Reference' (New Concept Definition), 'Definition' (New Concept Definition), 'Notes' (My Notes for this request), and 'Namespace'.
- New Concept:** Shows fields for 'Parent Concept' (Physical force (physical force) SNOMED CT), 'New Concept FSN' (A New Concept (administrative concept)), 'Semantic Tag' (special concept), 'Preferred Term' (a New Concept), and 'Synonym(s)' (sym 1, sym 2).
