**structure-entire-part**

A modeling approach used in SNOMED CT to represent anatomical entities such as body organs, systems, or regions.

**Notes**

- **Structure** is the most general way to refer to an organ, body system, or region.
- **Entire** refers to a complete organ, body system, or region.
- **Part** refers to a part of an organ, body system, or region. Part does **not** refer to the entire organ, body system, or region.

**Example**

*figure -0* below illustrates the relationships between the *structure, entire, and part* concepts applied to the heart.
