January 2016 - OIDM Project Group Teleconference

Date
January 26, 2016

GoToMeeting Details
https://global.gotomeeting.com/meeting/join/776381877

Attendees
- Elva Knight
- Jerry Sable
- Kel London
- Robert Housam
- Xavier Gansel

Apologies
- Lisbeth Dupont Rosenvold
- Suzanne Santamaria
- Riki Merrick
- Jim Case
- Farzaneh Ashrafi

Objectives
1. Finalize course of action on MRSA content request
2. Consider course of action for fastidious organisms
3. Discuss committee management using Confluence

Discussion items

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
<th>Owner</th>
<th>Notes</th>
<th>Action</th>
</tr>
</thead>
</table>
| 1    | Methicillin Resistant Staphylococci | Matt Cordell | • Matt Cordell has forwarded a request for "Non-multi methicillin resistant *S. aureus* (organism)" (aka, nmMRSA). See December 2015 meeting page for details.  

Jeff Wilcke will provide details of suggested course of action. See Meeting Files for powerpoint presentation MRSA.pptx | ✓ Jeff Wilcke will communicate group decision to editors. |

| 2    | Fastidious anaerobic gram negative bacteria | Farzaneh Ashrafi | Farzaneh has asked for consideration of this SIRS request:  

- FSN: Fastidious anaerobic gram negative bacilli (organism)  
- Parent: Anaerobic Gram-negative bacillus (organism)  
- Definition: specific growth requirements for generic reportable organism  
- Justification: Customer need  

Most fastidious bacteria are facultative anaerobes not obligate anaerobes (descendants of Anaerobic Gram-negative bacillus are obligate anaerobes).  
Farzaneh Ashrafi has asked submitter for additional details. Examples would be particularly helpful. Awaiting response. | ✓ Farzaneh Ashrafi will notify group when information comes from requestor. |

| 3    | Use of Confluence | Jeff Wilcke | PG Chair would like to use Confluence (only) to conduct PG business and communicate with team members. | ✓ Jeff Wilcke will contact IHTSDO tools group for additional guidance. |

Decisions

Item 1:
- "multi Methicillin Resistant S. aureus" (mMRSA) and "non-multi Methicillin Resistant S. aureus" (nmMRSA) will be added as PRIMITIVE subtypes of 115329001 | MRSA
  - Specific FSNs were not discussed. Literature uses terms quoted above. Jeff Wilcke does not think that these names are REALLY "fully specified." Suggestion: create text definition (descriptions).
  - add "mMRSA" and "nmMRSA" as synonyms (if consistent with editorial guidelines).
- retire 445107002 | Community Acquired MRSA and 445262003 | Hospital Acquired MRSA as ambiguous.
Item 2:

- Requester was the US. Request was withdrawn per Jim Case

Item 3:

- There were no specific objections to the use of Confluence for PG business
- Several PG members on the call do not seem to have a login to Confluence
- Chair is uncertain how to add them.
- No progress can be made until PG members can adequately access and use Confluence
