Relationship between Observable Entities and NPU codes

*Nomenclature, Properties, and Units (NPU)* is a coding system and terminology for identification and communication of examination results from clinical laboratories. Please see their website for more information: [http://www.npu-terminology.org/](http://www.npu-terminology.org/).

Logically there is a relationship between NPU and *SNOMED CT* observable entities. A pilot project examined overlaps and possible alignment; further work may be done. However, there is no formally maintained *SNOMED CT* documentation on this alignment.
