**hierarchy tag**

A parenthetical notation at the end of a **fully specified name** indicating the relevant **domain**.

**Notes**

- The purpose of *hierarchy tags* is to disambiguate **concepts** which have the same commonly used word or phrase.

**Examples**

- 55903007 | Acute atrophy (morphologic abnormality) with the *hierarchy tag*, morphologic abnormality in the body structure domain
- 89305009 | Abdominal paracentesis (procedure) with the *hierarchy tag*, procedure

**Alternatives**

- Semantic tag
