This area provides information on the SNOMED CT Authoring Platform

Currently most information can be found in the SNOMED CT Authoring Tooling space and will be moved here once the current phase of development completes.

The first tool deployed is the Single Concept Authoring tool -

Further requirements can be found here - Requirements of Single Concept Authoring (SCA) service

A user guide is currently in draft and will be available here when complete - ISUG

The source code will be made available under an Apache v2 open source license after a period of being run in. This will cover the following components:

- IHTSDO Terminology Server
- Single Concept Authoring code
- IHTSDO Component Identifier Service
