Example Pathway

This page shows an outline of the course linked to pages containing detailed metadata about each presentation.

Each page represents a Course consisting of one or more Modules. Some Modules may be divided into Sections. The Module and/or its Sections contain the sequence of presentations shown in the final column. Each Presentation has a hyperlink to a page containing information about that Presentation.

Authoring and Editing Instructions

1. Add a new table row for each Module or Module/Section combination
   a. Either Module or Section must be provided in each row.
   b. If Module is not provided it is inherited from the previous row.
   c. If Section is not provided the presentation will be included directly under the Module without a preceding Section heading.
2. Add presentations in the final column
   a. Type any part of the ELP filename you are looking for to see a list of matches
   b. Select the required presentation
   c. Use the the "+" to add another presentation and the "X" to remove and replace an existing presentation
3. Rows can be moved to reorder - Modules or to move a Section within a Module or to another Module
   a. Ensure that the first row in each Module/Section combination contains the name of the Module the Section is intended to be a part of.
4. Presentations can be moved to reorder within a Module/Section row
   a. Presentations cannot be directly moved to another Module/Section row
5. To move a Presentation to another Module/Section row
   a. Copy the text of the Presentation to the clipboard (to make it easier to add it to the new location)
   b. Delete the Presentation from the original Module/Section row
   c. Add the Presentation to the intended target Module/Section row
6. The course column contains the page title
   a. This link is automated and only visible to editors
7. The number column is auto-generated and exists primarily to allow the rows to be resorted to the authored order if they have been sorted in another order for any reason.
