</table>
| 7 | Terminology Capabilities | 10 | Dion McMurtrie | Overlap with FHIR Server capabilities / CodeSystem resource? How do we determine for a given FHIR Server which code systems and versions are supported?  
- Sufficient to query the code system resource? Is not considered sufficient (due to possibility of declared resources not being operationally implemented, i.e., used for simple storage). Could instead be declared in a capability statement.  
- Rob Hausam to supply tracker item on this issue.  
  GForge tracker #14539  
  The existence of a CodeSystem resource on a server should only be interpreted as a declaration of the code system properties, not as a declaration of server support and expected behavior  
  [https://gforge.hl7.org/gf/project/fhir/tracker/?action=TrackerItemEdit&tracker_item_id=14539&start=0](https://gforge.hl7.org/gf/project/fhir/tracker/?action=TrackerItemEdit&tracker_item_id=14539&start=0) |
| 8 | Review of proposals for possible Terminology Services and Resources collaborative work | 10 | Dion McMurtrie | See Collaborative Work:  
- Setting up and operating a FHIR terminology service  
- Intensional reference sets versus intensional ValueSets  
- Review and maintenance of Using SNOMED CT with FHIR page  
- Changes to SNOMED CT to improve usage through terminology services  
- Medication Resources for drug terminologies  
- All - Invitation to fill in capabilities of known FHIR Implementations: Features of Known Servers (Linda Parisien?). Suggestion that this could be taken forward into SnomedInside (MHosking)  
- Peter G. Williams to speak to Nick E about above. |
| 9 | Topic for next meeting | 5 | Peter G. Williams | Plan for following fortnight:  
- CodeSystem.Supplements (ReubenD) eg descriptions in additional languages.  
- Question over what is permissible under SNOMED licence conditions.  
- Feedback from HL7 Meeting / Connectathon |
| 10 | Any other business | 0 | Peter G. Williams | Jane Millar working on draft Terms of Reference, to be reviewed by The Member Forum (meeting in February) |
