Additional Notes

This release focuses on Terminology Server updates for improved reuse of published reference set members leading to a cleaner RF2 release, including the hotfix which was applied on 31 May 2016 for updates related to language reference set members for the International Edition Beta Release scheduled for 1 June 2016.

As well as the changes supporting the International Edition Beta Release activities, this SCA release also includes fixes for MRCM validation not working for dragged role groups, and the taxonomy view always showing the focused concept as fully defined.

Module versions

Front-end Version 1.0.117

Back-end Version 4.5.49

Orchestration Service Version 1.23

TS Browser Version 0.17
