## Additional Notes

This is a maintenance release for SCA Managed Service, including prioritised improvements from author feedback. There is a known issue with edit panel automations when adding a new description which contains a bracketed term (such as a replacement FSN), which triggers the creation of language variant synonyms - these can simply be deleted if not needed, or perhaps used to update the preferred terms to match if defining a new FSN.

## Module versions

Module	Version	Deployment notes
Authoring-UI	2.3.6	new
Drools Rules	1.6.3-ms	unchanged
Identity Management Service (IMS)	1.1.0	unchanged
