# Authoring Platform Version 6.4.0 - Release Overview (aggregated)

**(i)** **About this release**

8 January 2020

- Authoring Platform 6.4.0: Release Notes
- Drools Rules 2.2.5: Release Notes
- SCT Browser 3.9.0: Release Notes
- MRCM 1.27.0: Release Notes
- RVF 2.5.3: Release Notes
- Classification Service 4.3.0: Release Notes
- *This is a scheduled maintenance release for the International Authoring Platform, running on the Snowstorm terminology server, which includes updated Drools Rules and brings the Int TS Browser to the latest SCT Browser version. An MRCM update has been applied to MAIN - changes can be rebased into project and tasks as needed. Also deployed alongside this release are updated versions of RVF and the Classification Service. This maintenance release also includes 7 new templates and 3 template updates.*

This page presents aggregated statistics of all related changes, including related Drools Rules, RVF validation report assertion, Classification Service updates, and Reporting Platform updates. It shows changes by type, functional area, and reporter, to give further insight into the nature and focus of this feature release, to which have been added the proportion of tickets raised by Content Team Authors, Testing Team and Technical Development Team, along with the proportion of Technical tickets related to performance and stability.

## Managed Service

Managed Service is currently on AP 5.* releases running on the SnowOwl Terminology Server. This AP 6.* release is for the International Authoring Platform only running on the Snowstorm Terminology Server and does not contain changes specific to just the Managed Service Authoring Platform, however two issues reported on that platform which affect both are included (see the Managed Service Reporter issues link for details).
