

Mapping Tool Version 1.7.4 - 24 January 2020 - Release Notes

New Features/Improvements

Key	Summary	Linked Issues
MAP-1666	Update simple terminology loader to handle ORPHANET	

Additional Notes

This is an update to specifically handle loading in the ORPHANET terminology. This release coincided with migration to a new server with an upgraded version of Ubuntu. At the same time, we took the opportunity to upgrade versions Java and other dependencies.

Note: the new deployment pipeline requires up-versioning for every potential release, and we iterated through several potential releases before one was approved, hence the jump in version-number.

Module versions in this deployment

Module	Version	Deployment notes
International Mapping Service	1.7.4	new
