

# SNOMED International Joins the COVID-19 Interoperability Alliance

May 22, 2020

SNOMED International, the leader in global clinical terminology, announces today the organization's participation in the [COVID-19 Interoperability Alliance](#). The Alliance is an informatics focused environment supporting collaborative authoring of COVID-19 related interoperability data resources.

Alongside Alliance partners Clinical Architecture, logica, MITRE, Regenstrief Institute, Apelon, and Care Evolution, SNOMED International joins an open collective where parties can create, evolve and share meaningful data supporting the current COVID-19 global pandemic.
