

2020-09-28 Anesthesia CRG Meeting

Invitees:

Andrew Norton Andrew Marchant Monica Harry Ian Green Jane Millar
Steven Dain Maria Hendrickson Zac Whitewood-Moores Farzaneh
Ashrafi Ian Green Ellen Torres Maria Hendrickson Jeremy Rogers Ton
i Morrison Martin Hurrell Steven Dain

Present:

Andrew Norton Andrew Marchant Monica Harry Martin Hurrell Ellen
Torres Maria Hendrickson Toni Morrison

Anesthesia Clinical Reference Group

Time: Sep 28 2020 20:00 UK / 15:00 ET

Join from PC, Mac, Linux, iOS or Android:

Or Telephone:

Dial:
+1 646 518 9805 (US Toll)
+44 203 481 5237 (GB Toll)
+1 587 328 1099 (CA Toll)

Meeting ID: 915 8892 8783
Password: 573601

International numbers available: <https://snomed.zoom.us/u/avs0qL3Fx>

Item	Description	Owner	Notes
1	Introductions and Apologies	Andrew Norton	Apologies: Steven Dain Zac Whitewood-Moores
2	Notes of meeting held on 28 July 2020		Confirm notes of meeting - agreed by the group as a satisfactory record.
3	Matters arising from the previous meeting notes		Terms for COVID-related airway complications appear to be valuable. Extensive airway oedema, beyond standard descriptions of anatomical distribution, may be seen and current terms do not really capture this. There may be specific distributions of oedema related to COVID, or patho-physiological characteristics which require further description. Research into these areas is ongoing and may clarify any specific features of the COVID-related situation.
4	Planning of agenda and items for discussion on Wednesday 7th October	Patrick McCormick Andrew Marchant Andrew Norton Ian Green	<p>The Anesthesia CRG will be one of the CRG's holding a parallel session during the SNOMED for Clinicians meeting during the SNOMED International virtual autumn meeting. We note that over 1000 attendees have registered and we hope that a number of attendees will join the Anesthesia CRG session</p> <div data-bbox="683 1335 783 1433"> </div> <p>Clinical session...- EXPO 2020.docx</p> <p>Andrew Norton is willing to present an overview of the Anesthesia CRG and its history. Historical work is worthy of summary and current work, including assessment systems and ventilator terminology, will hopefully be of interest.</p> <p>Martin Hurrell is willing to give a brief introduction to the co-operation between the Anesthesia CRG and groups in HL7.</p> <p>Further discussions could include ISO 19223.</p> <p>There will be time allocated for questions and discussion.</p>

5	Review discussion of modelling assessment scales	Andrew Norton Monica Harry Maria Hendrickson	<p>Review proposals as relate to Glasgow Coma Scale Glasgow Coma Score. Extensive discussion on this topic has already occurred and was noted on the Confluence pages.</p> <p>Further scores could include the SOFA (Sequential Organ Failure Assessment Scoring) scoring system, which is now an observable entity in the US release of SNOMED.</p> <p>Clinical Frailty Score is viewed as another valuable system to record.</p> <p>These areas are to be discussed with the modelling advisory group.</p>
6	SNOMED updates	Monica Harry Ian Green	<p>A content request regarding ventilation terminology used in ISO 19223 is under discussion, and this was noted by the CRG. The new ventilator modes in the standard will be described as therapies rather than procedures - much of SNOMED's older terminology describes ventilation as a procedure and this is considered a less clear choice. Monica Harry to check that there's no problem in harmonising these systems, e.g. in view of copyright considerations. Modelling will need to include acronyms as well as full-text versions of the terms.</p> <p>Respiratory physiological terminology used in ISO 19223 is worth reviewing, so that all concepts used can be described in SNOMED. Terminology continues to evolve, and terms such as "rate" will need to be defined so as to be consistent and relevant to their context.</p>
7	Any other business		No further business was proposed.
8	Next Meeting - Weds 7th October 2020 at 15:30 UTC		2020-10-07 Anesthesia CRG Session - SNOMED for Clinicians Meeting agenda
