

Traceability matrix - MedDRA (January 2021)

January 2021 Pre-Production Release (Version 11) vs January 2021 Production Release (Version 1) traceability

Differences found in package Comparison	Number of records impacted	Rationale
Readme file		Updated to remove x prefixes + move to Production naming conventions, as expected
RefsetDescriptor files	4	4 records had UUID's updated, as expected (as this is a first time Production release so it will ALWAYS refresh the UUIDS)
ModuleDependency files	2	Both records had UUID's updated, as expected (as this is a first time Production release so it will ALWAYS refresh the UUIDS)

January 2021 Pre-Production Release (Version 9) vs January 2021 Pre-Production Release (Version 11) traceability

Differences found in package Comparison	Number of records impacted	Rationale
SNOMED to MedDRA Map files	2	2 records removed: < 19cb2be2-115c-586d-adcd-4c94d96ad12a 20210131 1 816211006 816210007 54535009 10010296 < 4ef76305-c7be-5d74-94bc-c5379b011eb1 20210131 1 816211006 816210007 165426009 10058506 As expected, as confirmed by Donna (internal) + Amanda (MedDRA) via email at 12:44 on 23 Apr 2021
MedDRA to SNOMED Map files	3	3 records removed: < 70032335-e819-5cf2-ae06-44082612dd48 20210131 1 816211006 816209002 10056193 54535009 < 7aaabea8-40e8-5353-95d1-cd9a83e359f3 20210131 1 816211006 816209002 10049486 54535009 < 88e644fe-d878-5ef5-ba5a-980e0977416d 20210131 1 816211006 816209002 10029825 165426009 As expected, as confirmed by Donna (internal) + Amanda (MedDRA) via email at 12:44 on 23 Apr 2021
RefsetDescriptor files	4	4 records had UUID's updated, as expected (as this is a first time Production release so it will ALWAYS refresh the UUIDS)
ModuleDependency files	2	Both records had UUID's updated, as expected (as this is a first time Production release so it will ALWAYS refresh the UUIDS)

January 2021 Pre-Production Release (Version 8) vs January 2021 Pre-Production Release (Version 9) traceability

Differences found in package Comparison	Number of records impacted	Rationale
RefsetDescriptor files	4	4 records had UUID's updated, as expected (as this is a first time Production release so it will ALWAYS refresh the UUIDS)
ModuleDependency files	2	Both records had UUID's updated, as expected (as this is a first time Production release so it will ALWAYS refresh the UUIDS)

January 2020 ALPHA (PUBLISHED) vs January 2021 Pre-Production Release (Version 9) traceability

Differences found in package Comparison	Number of records impacted	Rationale
RefsetDescriptor files	4	4 records had UUID's updated, as expected
ModuleDependency files	2	Both records had UUID's updated, as expected
Readme file	n/a	EffectiveTimes etc updated for Jan 2021 as expected
SNOMED to MedDRA Map files		<p>3684 records removed</p> <p>3729 added</p> <p>This means all 3684 records had their effectiveTimes replaced (since the Alpha) with the new Prod effectiveTimes + 45 new records were added since last year's Alpha release...</p> <p>This matches the stats in the WCI files exactly (3729 new records in 2021 Prod release).</p> <p>Emailed Rick to check the extra 45 records sounds right...</p>
MedDRA to SNOMED Map files		<p>6374 records removed</p> <p>6467 added</p> <p>This means all 6374 records had their effectiveTimes replaced (since the Alpha) with the new Prod effectiveTimes + 93 new records were added since last year's Alpha release...</p> <p>This matches the stats in the WCI files exactly (6467 new records in 2021 Prod release).</p> <p>Emailed Rick to check the extra 93 records sounds right...</p>
OWLEExpression files		STILL MISSING IN VERSION 2 package?!!! Can't get the package to include them (no help in logs!), so will add in for the Production release in 2021.....

January 2020 ALPHA (PUBLISHED) vs January 2021 Pre-Production Release (Version 1) traceability

Differences found in package Comparison	Number of records impacted	Rationale
RefsetDescriptor files	4	4 records had UUID's updated, as expected
ModuleDependency files	2	Both records had UUID's updated, as expected
Map files		Invalid records found and missing records found, so WCI are revising and sending updated versions of the input Delta files
OWLEExpression files		STILL MISSING IN VERSION 2 package?!!! Can't get the package to include them (no help in logs!), so will add in for the Production release in 2021.....
