

SNOMED CT Authoring Platform

This area provides information on the SNOMED CT Authoring Platform

Status	LIVE
Version	1.0 Candidate

Currently most information can be found in the [SNOMED CT Authoring Tooling](#) space and will be moved here once the current phase of development completes

The first tool deployed is the Single Concept Authoring tool -

Further requirements can be found here - [Requirements of Single Concept Authoring \(SCA\) service](#)

A user guide is currently in draft and will be available here when complete - [ISUG](#)

The source code will be made available under an Apache v2 open source license after a period of being run in. This will cover the following components:

- IHTSDO Terminology Server
- Single Concept Authoring code
- [IHTSDO Component Identifier Service](#)
