

Frequent releases of SNOMED CT International Edition support greater interoperability

Last year, SNOMED International announced it would transition to more frequent releases of the SNOMED CT International Edition rather than just twice a year. Since January 2022, the organization has released the clinical terminology at the end of each month.

Consuming the release on a monthly basis is not required, however, as Members can continue on a biannual schedule if they so choose – there are numerous benefits to being able to access SNOMED CT more frequently. Frequent releases support better interoperability, as organizations and entities can now consume release content that is more aligned with other organizations, for example. As well, it makes it easier to complete smaller projects...
