

Collaboration agreement between SNOMED International and the International League Against Epilepsy will raise the clinical quality of global epilepsy terminology

September 14, 2022

SNOMED International and the International League Against Epilepsy (ILAE) have signed a five-year agreement that will contribute to global improvements in care and services for people with epilepsy, a group of disorders characterized by recurrent seizures.

The ILAE Commission for Big Data and SNOMED International have established an [Epilepsy Clinical Project Group](#). Members of this group will work together to define processes to maintain and update epilepsy content within the international edition of SNOMED CT's clinical terminology, the world's most comprehensive healthcare terminology product...
