

# Find the FSN or PT for a known concept SCTID

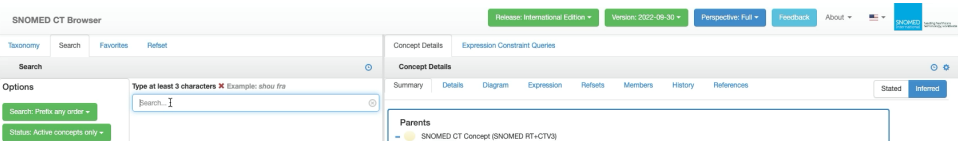

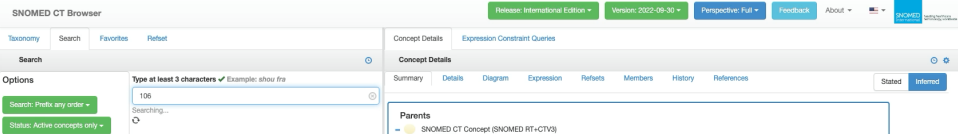

## In this page:

Find the Fully Specified Name (FSN) and/or Preferred Term (PT) for a concept given its SNOMED CT Identifier (SCTID).

Prerequisite steps: [Browse SNOMED CT International Edition concepts](#)

[Exploring SNOMED CT Content using the SCT Browser \(YouTube playlist\)](#)

[All SNOMED CT Education Videos \(YouTube playlist\)](#)

Steps	References
From the SNOMED CT Browser Full perspective, Search tab context, enter the SCTID into the search... query box.	
	

As shown in the example hint above the Search... query box, for text-based interfaces, after typing 3 characters the search results will begin to dynamically respond to the entered text.

Whilst updating, the guide text "Searching..." will appear briefly below the search box until results are returned. Response time depends on the query and matching results, but typically it is within a few seconds.

Search results matching the entered number will be presented below the search box. The number of matches and

The screenshot displays the SNOMED CT Browser interface. At the top, there is a navigation bar with links for 'Nelson International Edition', 'Version: 2022-09-30', 'Perspective: Full', 'Feedback', 'About', and a 'SNOMED' logo. Below this, the main interface is divided into a left sidebar and a main content area. The sidebar contains tabs for 'Taxonomy', 'Search', 'Favorites', and 'Refset'. The 'Search' tab is active, showing a search bar with the text '100063300', a dropdown menu with 'Cardiovascular finding' selected, and buttons for 'Search: Prefix any order', 'Status: Active concepts only', and 'Expand results'. The main content area has tabs for 'Concept Details' and 'Expression Constraint Queries'. The 'Concept Details' tab is active, showing a 'Summary' section with 'Cardiovascular finding (finding)' and a 'Parents' section with 'SNOMED CT Concept (SNOMED RT-CTV3)'.

Alternatively, the screen cursor can be used - click within a row to highlight it, then drag the highlighted into the right hand *Concept Details* panel, to replace its current focus concept with the row concept.

Press the Details tab in the Concept Details pane to see detailed information including the concept FSN and Preferred Term in each relevant language reference set.
