

July 2022 SNOMED CT GP/FP Reference Sets Production release available

Dear all,

The Production release of the July 2022 SNOMED CT® General Practitioner/Family Practitioner (GP/FP) Reference Sets package is now available, from the MLDS distribution site.

This package may be distributed to Affiliate Licensees and third parties at any time, within the relevant licensing restrictions. The Production release of the SNOMED CT® General Practitioner/Family Practitioner (GP/FP) Reference Sets package is dependent upon, and should therefore be consumed in conjunction with the July 2022 SNOMED CT® International Edition.

All files distributed are available from the "July 2022 v1.0" version in the "SNOMED CT GP/FP Refset package" project, which can be found on the "SNOMED Releases" page in MLDS, accessed here:

<https://mlds.ihtsdotools.org/#/ihtsdoReleases>

The SNOMED CT® GP/FP Reference Sets package contains SNOMED CT files in Release Format 2 (RF2) only, distributed in a zipped file archive:

- SnomedCT_GPFP_PRODUCTION_20221130T120000Z.zip

The Release Notes have been separated from the release package, and so can be downloaded as a distinct pdf file from the same MLDS release version:

- doc_SnomedCT-GPFP-Production-ReleaseNotes_Current-en-US_INT_20220731.pdf

The Release Notes can also be accessed online from the following page:

- <https://confluence.ihtsdotools.org/pages/viewpage.action?pageId=115890220>

Those Members using MLDS as their distribution site will find that their affiliates have access to the new release automatically.

If you have any questions about the July 2022 SNOMED CT® GP/FP Reference Sets package, or have difficulties downloading the files from the distribution site, please contact SNOMED International at support@snomed.org with "July 2022 SNOMED CT® GP/FP Reference Sets package release question" in the subject line.

Kind regards,

Andrew Atkinson | Release Manager
