| 1    | Record meeting                                               | Scott Campbell |                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | PNG File image2022-1-24_11-25-50.png                                                                                                      | 2023-Mar-06 by Scott Campbell                                                                           |
| 2    | Status update                                                | Scott Campbell | 1. Updates                                       | 1. Content release maps discussed. Scott Campbell Ji-Eun Hwang will populate ICCR templates and circulate to CSRWG members and ICCR for content review.<br>2. Status? Ian Green Jane Millar to work with ICCR to see if such content can be included in implementation guide as appendices. Daniel Karlsson would like FHIR bindings discussed and articulated.                                                                                                                                                                                                                                               | PNG File image2022-1-24_10-37-22.png                                                                                                      | 2023-Mar-06 by Scott Campbell                                                                           |
| 2    | Closing gaps in content - dysplasia and neoplasia at margins | Scott Campbell | 1. Continue discussion                           | 1. Concept created. Is the name sufficient? Is the definition adequate? (Note: intramucosal carcinoma will NOT be subsumed by this concept.)<br><br>1269006002 [Noninvasive pre-malignant neoplasm (morphologic abnormality)]<br><br>Definition: This concept represents a neoplasm considered pre-cancerous and/or with high potential to become malignant. In solid organ neoplasms, the neoplasm has not broken through a basement membrane, and in lymphoid neoplasms, no architectural effacement is present.<br><br>All attendees agreed that this concept works with the removal of lymphoid neoplasms | PNG File image2022-1-24_10-36-24.png<br><br>PNG File image2022-1-24_10-35-11.png<br><br>PNG File Screen Shot 2022-01-10 at 9.02.45 AM.png | 2023-Mar-06 by Scott Campbell<br><br>2023-Mar-06 by Scott Campbell<br><br>2023-Mar-06 by Scott Campbell |
| 3    | Neuroendocrine grade /morphology                             | Scott Campbell | 1. Blending grade and type<br><br>2. NET remodel | Will proceed with existing NET concepts as they exist despite the flaws. NET, NEC, NEN will be remodeled as part of the histology quality project.<br><br>Lots of discussion. Several would like to participate in this exercise including Laszlo Igali @dubois @rous                                                                                                                                                                                                                                                                                                                                         | PNG File image2021-12-13_9-24-30.png<br><br>PNG File image2021-12-13_9-3-22.png<br><br>PNG File image2020-8-24_15-2-23.png                | 2023-Mar-06 by Scott Campbell<br><br>2023-Mar-06 by Scott Campbell<br><br>2023-Mar-06 by Scott Campbell |
