Creating a Translation

Overview

Documentation on creating a Translation.
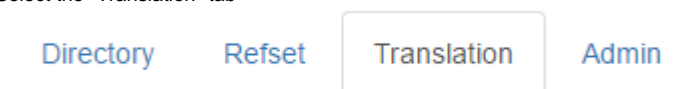

Prerequisites

- The user must have a role on an existing project (see Creating a New Project and Assigning Users to a Project) as well as a Refset (see Creating a Refset).

Adding a Translation

To add a translation follow these steps:

- Log into the tool (https://refset.ihtsdotools.org)

- Select the "Translation" tab

- Choose the project in which you want to create the translation.

- Open the "Editing" Accordion (it will show the number of existing translations and your role)

- Next, click the "Add Translation" button along the right.

- Then, complete the form and click "Add". Many fields will be defaulted from your project selections.
