Importing and Exporting Refsets

Overview

Documentation on importing and exporting refsets.

Prerequisites

- For importing refset members, a user must have a Refset (see Creating a Refset).

Exporting Refset Members

To export a refset follow these steps:

- Log into the tool (https://refset.ihtsdotools.org)
- Select the "Refset" tab or the "Directory" tab.
- Choose the Refset you want to export and the Refset Members will be displayed in the table below.

- Click on the "Export refset members" icon

- Fill in the "Export Refset Members" form

- Double click on the downloaded file displayed on your browser frame or open the Downloads directory on your computer to find the exported file.

Importing Refset Members

To import a refset follow these steps:

- Log into the tool (https://refset.ihtsdotools.org)
- Select the "Refset" tab.

Directory Refset Translation Admin
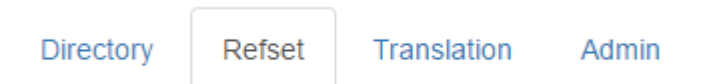

- If the refset into which you want to import the refset members is not yet assigned to the user, assign it.
- Choose the "Assigned" accordion
- Select the refset that will contain the refset members. Note: the refset must be an extensional refset.
