

Releasing a Translation

Overview

Documentation on releasing a translation.

Prerequisites

- For releasing a translation, the user must have at least one concept translated and the review workflow phase(s) must be complete.

Releasing a Translation

To release a translation follow these steps:

- Log into the tool (<https://refset.ihtsdotools.org>)
- Select the "Translation" tab or the "Directory" tab.
- Ensure that your project role is the final reviewer in your project's workflow.
- Choose the Translation you want to release.
- Ensure that all concepts to be released are in a Finished state.
- Click the  'Mark ready for publication' icon for each concept that will be released.

Assigned Concepts (2)

<input type="text" value="Search"/>			Actions
Concept Id	Name	Last Modified	  
10675991000119100	Acute severe exacerbation of mild persistent allergic asthma co-occurrent with allergic rhinitis (disorder)	2017-01-24 19:08:32	    
10675871000119106	Mild persistent allergic asthma (disorder)	2017-01-24 19:08:32	    

- Concepts that are ready for publication move into the Finished Concepts list

Finished Concepts (2)

			  
Concept Id	Name	Last Modified	Actions 
10675991000119100	Acute severe exacerbation of mild persistent allergic asthma co-occurrent with allergic rhinitis (disorder) • exacerbación aguda grave de asma persistente leve co-occurrente alérgica con la rinitis alérgica	2017-01-24 19:20:02	   
10675871000119106	Mild persistent allergic asthma (disorder) • asma alérgica persistente leve	2017-01-24 19:20:02	   

- Start the release process by clicking the  release icon next to the translation to be released.
