

# IHTSDO Traceability matrix - GMDN (January 2017)

Production (July 2016 Release) to Production (January 2017) traceability

Differences found in package Comparison	Number of records impacted	Rationale
SimpleMap (Snapshot) file	642	228 new Active records (added as part of the normal GMDN Release authoring/mapping cycle - this matches the 233 Toni authored, minus the 5 Krista/Donna mapped to "No Target" - see the email trail from 23/02/2017 from 17:55) +  411 records inactivated from the 20160131 release (in line with the mapping tool's interpretation of the January 2017 International Edition) +  3 records inactivated from the 20160731 release (in line with the mapping tool's interpretation of the January 2017 International Edition)
ModuleDependency Full file	4	2 new 20170131 records added (as expected) +  2 new records added for missing 20160731 records (to ensure that the Full history is correct)
ModuleDependency Snapshot + Delta files	2	2 old records replaced with the new 20170131 records (as expected)
