

# Pharmacy Clinical Reference Group

Welcome to the Pharmacy Clinical Reference Group space

The SNOMED International Pharmacy Clinical Reference Group is a community of practice for the clinicians focused on the pharmaceutical domain.

The role of all Clinical Reference Groups is to provide a forum to discuss issues, and influence the development and improvement of content in SNOMED CT.

The Pharmacy Clinical Reference Group has been established to ensure that the requirements of the international pharmaceutical community are incorporated into the content of SNOMED CT International Release, and also to support the development of derivative products that will support implementations within the pharmaceutical domain.
