

# Blood Components Clinical Reference Group

## Welcome to the Blood Components Clinical Reference Group space

The SNOMED International Blood Components Clinical Reference Group is a community of practice for clinicians focused on blood components and associated usage.

The role of all Clinical Reference Groups is to provide a forum to discuss issues, and influence the development and improvement of content in SNOMED CT.

The Blood Components Clinical Reference Group has been established to ensure that the requirements of blood components are incorporated into the content of SNOMED CT international Release and also to support the development of derivative products that will support implementations focused on using SNOMED CT for public health purposes.

The Blood Components Clinical Reference Group has a dedicated Zoom account

. . link to be added . .

The link provides a Zoom discussion forum, which doesn't require a chair/lead person, but provides access to a discussion space. All the functionality is still available, video, scene share. The only limitation is that currently it is not possible to record the calls. If this is required, please contact a member of the SNOMED International staff.

## Participate

We welcome participation from anyone interested in ensuring that SNOMED CT supports the clinical requirements for electronic documentation and communication of patient care in any setting, focused on blood components

If you wish to participate in discussions you must be logged onto Confluence with your username and password.

If you do not have a Confluence account [click here](#)
