Additional Notes

This is a major functional release which unifies the underlying codebases for International and Managed Service to optimise future development and support dependencies for all authoring platforms. From this version onwards the same application updates will be applied to all platforms for each release version, so authors working on specific platforms will also see prioritised fixes and enhancements that may have been originally raised /requested on others, as well as those raised for their platform.

This release integrates the latest version of the SnowOwl terminology server, for improved future enhancement capabilities, as well as unified International and Managed Service authoring platform maintenance.

Module versions in this deployment

Module	Version	Deployment notes
Authoring-Services (API)	5.3.2	new
Authoring-UI	2.4.10	new
Drools Rules	1.12	new
MRCM Rules	1.11	unchanged
Orchestration Service	1.35.3	new
SNOMED Templates	1.1.6	unchanged
Template Service (API)	1.4.3	unchanged
Terminology Server	5.10.8	new
Traceability Service	1.0.5	unchanged

TS Browser	0.19	unchanged
------------	------	-----------

Note that the Spellcheck Service (API) module from previous deployments is no longer present, as spellcheck support is now part of the Authoring-Services (API) module.
