Additional Notes

This is the first Managed Service (MS) release with the underlying TermServer Converged Codebase (TCC) for International and MS to optimise future development and support dependencies for all authoring platforms, and therefore also implicitly marks the migration to flat-indexing for MS, with associated performance and stability improvements. This release note aggregates the tickets across all International Authoring Platform releases from version 2.4.0 to version 2.5.2, since their associated changes are now inherent in this first MS TCC release.

Module versions in this deployment

Module	Version	Deployment notes
Authoring-Services (API)	5.3.4	new
Authoring-UI	2.5.1	new
Drools Rules	1.13	new
