

# Visibility of upcoming changes and Release announcements

Dear all

This blog is designed to provide everyone with full visibility of Release announcements regarding all SNOMED CT products, along with details of future changes that will be implemented in upcoming Releases.

It would therefore be great if you could please publicise this blog to the relevant vendors and associates who would benefit from such information.

They can sign up to receive automated updates whenever a new announcement is made, simply by logging into Confluence, and selecting "Watch this blog" from the blog's home page (<https://confluence.ihtsdotools.org/pages/viewrecentblogposts.action?key=RMT>).

Thanks very much for your time,

Kind regards

Andrew Atkinson | Release Manager
