Family Practice and General Practice Clinical Reference Group

Welcome to the Family Practice and General Practice Clinical Reference Group space

The SNOMED International Family Practice and General Practice Clinical Reference Group is a community of practice for primary care focused on family practice and general practice.

The role of all Clinical Reference Groups is to provide a forum to discuss issues, and influence the development and improvement of content in SNOMED CT.

The Family Practice and General Practice Clinical Reference Group has been established to ensure that the international requirements of the primary care community are incorporated into the content of SNOMED CT International Release, and also to support the development of derivative products that will support implementations focused on family practice and general practice.
