

UPDATE: January 2018 SNOMED CT International Edition – new Member Release distribution available

Dear Members,

The provisional Member Release distribution of the January 2018 SNOMED CT® International Edition has been updated. ***This update supersedes the version originally released on December 31st 2017, and should be used in place of the original in all situations.***

Please see tickets ISRS-320 + ISRS-322 in the “3.2 Resolved Issues” section of the attached Member Release notes for technical details of the update. A briefing note is also attached with further details if required.

- <https://confluence.ihtsdotools.org/display/RMT/SNOMED+CT+January+2018+International+Edition+-+SNOMED+International+Member+Release+notes>

To access the updated package and Release Notes, please find them in the “January 2018 v1.1” version in the “Offline & Alpha/Beta versions” section of the “SNOMED CT International Edition” project in MLDS here:

<https://mlds.ihtsdotools.org/#/ihtsdoReleases>

The file name of the updated package is as follows - note the updated time stamp to distinguish this from the original release, as per the new file naming conventions:

- SnomedCT_InternationalRF2_MEMBER_20180131T150000Z.zip

The updated package is part of the Member release of the January 2018 SNOMED CT® International Edition. Member distribution files should not be released to Affiliate Licensees, or any third parties until the public release date, January 31st 2018.

If you have any questions about the update, have difficulties downloading the file or accessing the documentation, please contact SNOMED International at support@snomed.org with “January 2018 International Edition Member release question” in the subject line.

Kind regards,

Andrew Atkinson | Release Manager
