

Drug and Substance changes in Jul2018 international release

Most Drug and Substance changes have been presented in the recent Alpha release, however the numbers are still evolving and will likely change before the final version of the release notes are generated in July. Some of the changes include Use of additional Axioms, which is explained in details in this briefing

[Briefing note - Use of Additional Axiom Functionality and Remodeling Product Roles.pdf](#)

[Briefing note - Implications of describing liquid dose form product concepts using presentation strength.pdf](#)
