Validation report assertion changes since last release

All platforms

International only

Managed Service only

None since last release.

None since last release.

None since last release.

Additional Notes

This is an expedited emergency hot-fix release to correct a scenario related to inactivation in which the system may delete a published component. This hot-fix also rolls up the AP 2.8.2 MS Norway dialect hot-fix to synchronise Drools Rules for International (no impact of MS dialect changes to International rules).
