

# Upcoming changes to the ICNP file naming conventions

Dear all

In future releases of the ICNP to SNOMED CT packages, we will be refining the file naming convention, in order to better distinguish between the two releases: Diagnoses and Interventions.

Therefore, instead of the Concept file, for example, being called "sct2\_Concept\_ICNPSnapshot\_INT\_20180131.txt" in both packages, it will now be called the following in each relevant release:

- sct2\_Concept\_ICNPDiagnosesSnapshot\_INT\_[date].txt
- sct2\_Concept\_ICNPInterventionsSnapshot\_INT\_[date].txt

This change will be implemented for all ICNP releases going forward - please let us know if you have any questions or concerns over this change.

Kind regards,

Andrew Atkinson | Release Manager
