

# Task View - Taxonomy

Steps	Reference												
<p>From various components of the</p> <p>Authoring Platform a  <b>View in Taxonomy</b> button can be used to show a concept's position in the taxonomy. Selecting the <b>View in Taxonomy</b> button will load the concept in the Taxonomy pane.</p> <p>Note: only one concept can be viewed at a time and selecting a different concept will replace the Taxonomy tree with that of the newly selected concept.</p>	 <p>The screenshot displays the 'Single Concept Authoring' interface. On the left, a 'Taxonomy' pane shows a hierarchical tree of concepts, with 'Diabetes mellitus excluded (situation)' selected. The central area shows a concept map for this selected concept, including relationships like 'is a (attribute)', 'Finding context (attribute)', and 'Subject relationship context (attribute)'. The right-hand pane, titled 'Diabetes mellitus excluded (situation)', contains a table of related concepts and their relationships.</p> <table><tr><th>Concept</th><th>Relationship</th><th>Value</th></tr><tr><td>Diabetes mellitus excluded (situation)</td><td>is a (attribute)</td><td>Diabetes mellitus excluded (situation)</td></tr><tr><td>Diabetes mellitus excluded (situation)</td><td>Finding context (attribute)</td><td>Known absent (qualifier value)</td></tr><tr><td>Diabetes mellitus excluded (situation)</td><td>Subject relationship context (attribute)</td><td>Subject of record (person)</td></tr></table>	Concept	Relationship	Value	Diabetes mellitus excluded (situation)	is a (attribute)	Diabetes mellitus excluded (situation)	Diabetes mellitus excluded (situation)	Finding context (attribute)	Known absent (qualifier value)	Diabetes mellitus excluded (situation)	Subject relationship context (attribute)	Subject of record (person)
Concept	Relationship	Value											
Diabetes mellitus excluded (situation)	is a (attribute)	Diabetes mellitus excluded (situation)											
Diabetes mellitus excluded (situation)	Finding context (attribute)	Known absent (qualifier value)											
Diabetes mellitus excluded (situation)	Subject relationship context (attribute)	Subject of record (person)
