

# ServiceRequest

## HL7 Specification

<http://build.fhir.org/servicerequest.html>

## Child Pages

Element	Current	Discussion
category	108252007 Laboratory procedure 363679005 Imaging 409063005 Counselling 409073007 Education 387713003 Surgical procedure	Add "Opinion" ? Also "Rehabilitation" ?  What current types of referrals exist? <a href="#">Jeremy Rogers</a> to provide.
code	< 71388002  Procedure (procedure)	Some confusion here about the fact that a request for a procedure is a referral. However, we also have referral concepts within procedures (although Jeremy pointed out that it is possible to have one party (eg optometrist) request that another party (eg GP) make a referral).
orderDetail		The example here gives further detail to the service being requested. However, it is already possible to be as specific a SNOMED allows via the "code" element above. The use of this field when working with SNOMED CT concepts is not clear.
performerType	<125676002 (Person) <223366009 (Healthcare professional) <394730007 (Healthcare related organisation)	
reasonCode	< 404684003  Clinical finding (finding)   OR < 71388002  Procedure (procedure)	
bodySite	< 442083009  Anatomical or acquired body structure (body structure)
