

MAG Pre-meeting Reading

Hello all, apologies for not getting this out earlier, hopefully I've caught you before you jump on a plane!

If I can ask you all to look over the agenda first of all: [2018-10-15 & 17 - Face to Face MAG Meeting \(Vancouver\)](#)

The agenda is not set in stone, so please do get back to me with any suggestions for additional items or changes in priority.

Within the agenda, you will find the following links. It would be great if you could have a look through these and add any compelling comments which we can then be ready to discuss or resolve on Monday & Wednesday:

SCT Logic Profile: <http://snomed.org/lps>

SCT OWL Guide: <http://snomed.org/owl> Please note, the Necessary Normal Form (NNF) is covered in the section 2.5.

Safe travels and looking forward to seeing you all in Vancouver!

Best Wishes,
Peter
