Additional Notes

This is a scheduled feature release for volume authoring using templates for concept transformation, prioritised QI support, and prioritised Managed Service support, including Drools Rules updates. Please see the associated Drools Rules Version 1.25.1 release notes.

The Authoring Platform Version 3.2.0 - Release Overview (aggregated) page presents statistics which aggregate tickets from the interim Authoring Platform point versions since the last scheduled feature release (AP 3.1.0), along with related Drools Rules, RVF validation report assertions and Classification Service updates.

MRCM Rules Version 1.24.0 was deployed to the International Authoring Platform shortly after the AP 3.2.0 deployment (applied to the MAIN branch on Monday 26 November 2018, available via rebase to projects/tasks). Given the closeness of these releases, the aggregated release overview has been updated to cover these MRCM changes for inclusion in the AP 3.2.0 release overview / demos call (following the call this page will be updated with a link to the call recording), and the MRCM Rules note in the versions table has been updated to include it.

Release Overview - Demo (zoom call recording)
