

Authoring Platform Version 4.1.0 - Release Overview (aggregated)

About this release

This is a scheduled feature release for volume authoring using templates for concept transformation, prioritised QI support, and prioritised Managed Service support, including Drools Rules updates.

This page shows changes since the last scheduled related feature releases ([AP 3.3.0](#) and [RP 1.0.0](#)), including related Drools Rules, RVF validation report assertions, Classification Service updates, and Reporting Platform updates, and presents a breakdown of changes by type, functional area, and reporter, to give further insight into the nature and focus of this feature release.
