Additional Notes

This is a scheduled maintenance and feature release for prioritised QI support, and prioritised Managed Service support, including Drools Rules updates, and Reporting Platform updates, accompanied by a major upgrade for the Identity Management Service (IMS) for streamlined login /authentication and related platform configuration updates for improved stability and maintainability.

This AP version has the following associated and dependent releases:

- Drools Rules Version 1.28.0
- Reporting Platform Version 1.2.0
- IMS Version 2.0.0

The Authoring Platform Version 4.2.0 - Release Overview (aggregated) page presents aggregated statistics of all related changes, including related Drools Rules, RVF validation report assertion, Classification Service updates, and Reporting Platform updates. It shows changes by type, functional area, and reporter, to give further insight into the nature and focus of this feature release, to which have been added the proportion of tickets raised by the International Content Team, Managed Service Authors, Testing Team and Technical Development Team, along with the proportion of Technical tickets related to performance and stability.
